

An ITEA Smart engineering project

EFICAS

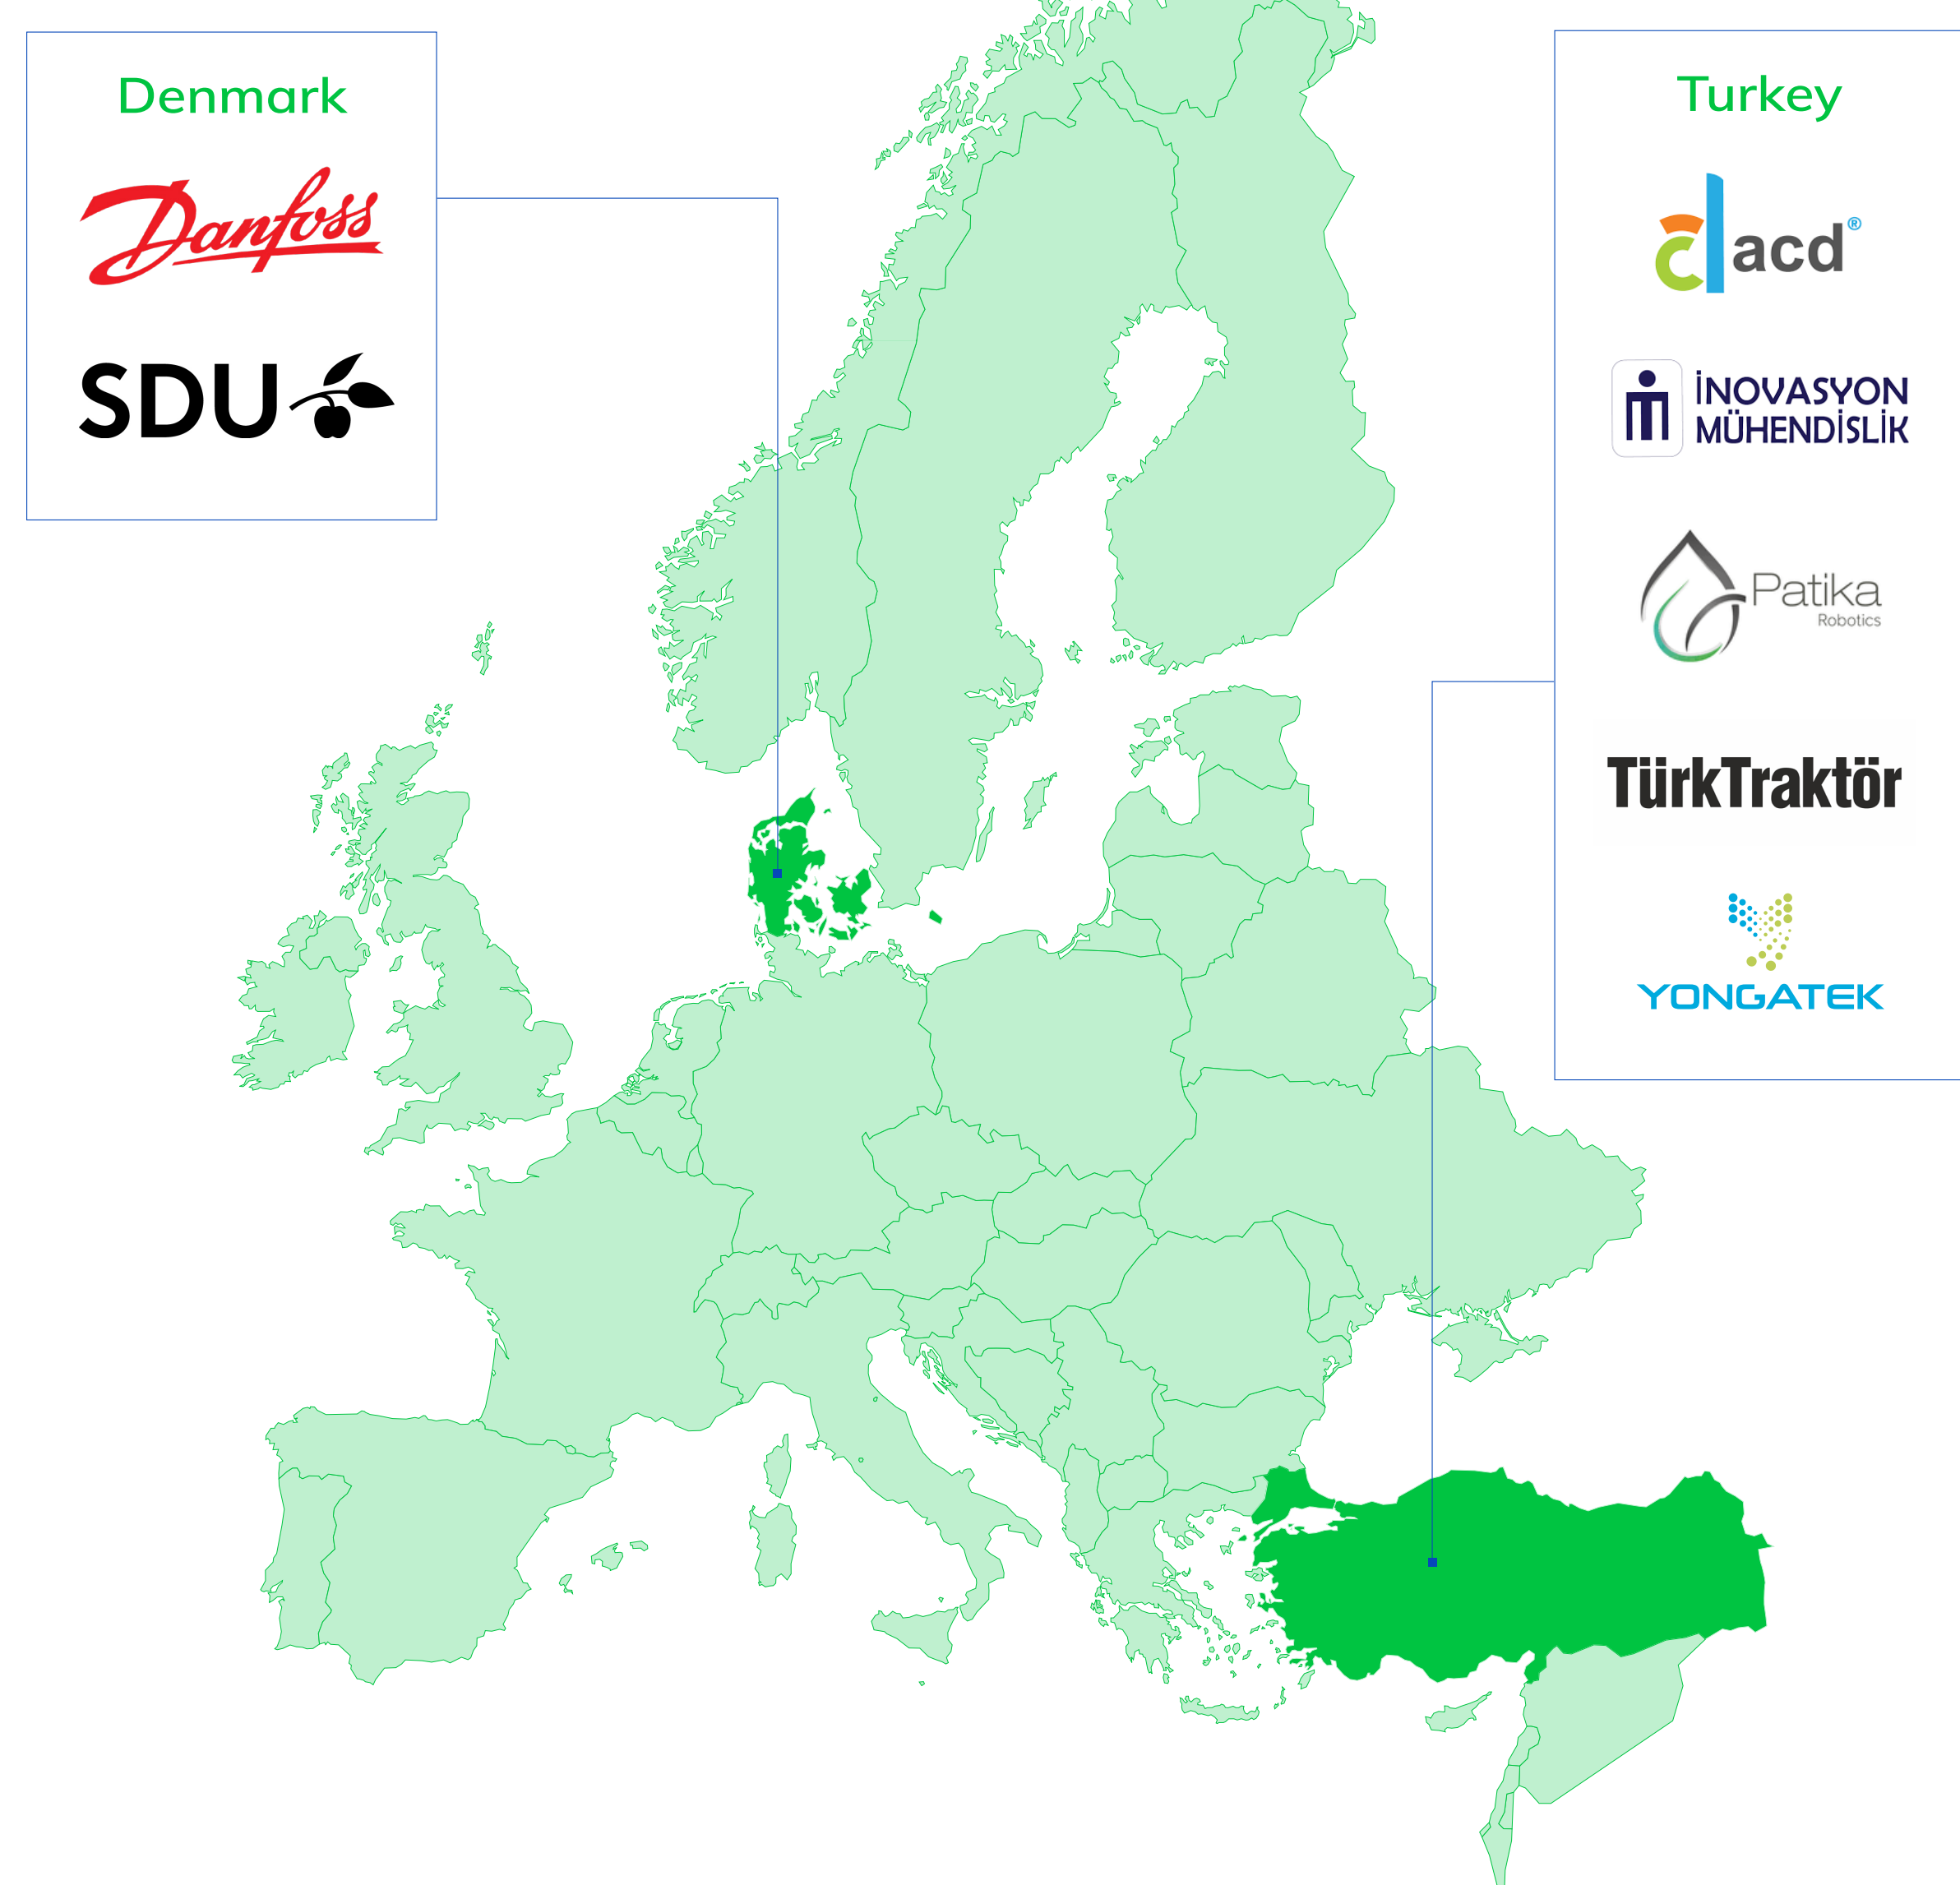

Finding the balance between AI performance and power consumption

Project summary

The AI Call 2020 project EFICAS (Energy Efficient Heterogeneous AI Framework for Smart Mobile and Embedded Systems) will create a software solution which can run on heterogeneous computation environments. This will uncover the right balance between performance and energy efficiency for AI algorithms in various domains.

Consortium

Project duration

September 2021 - December 2024

Expected key results / advantages

- > EFICAS Framework with Heterogeneous Computation
- > Energy Efficient AI Library for Cross Domain Applications
- > Practical Use Cases on Agriculture, Industrial Automation and Mobile Robotics

EFICAS project website

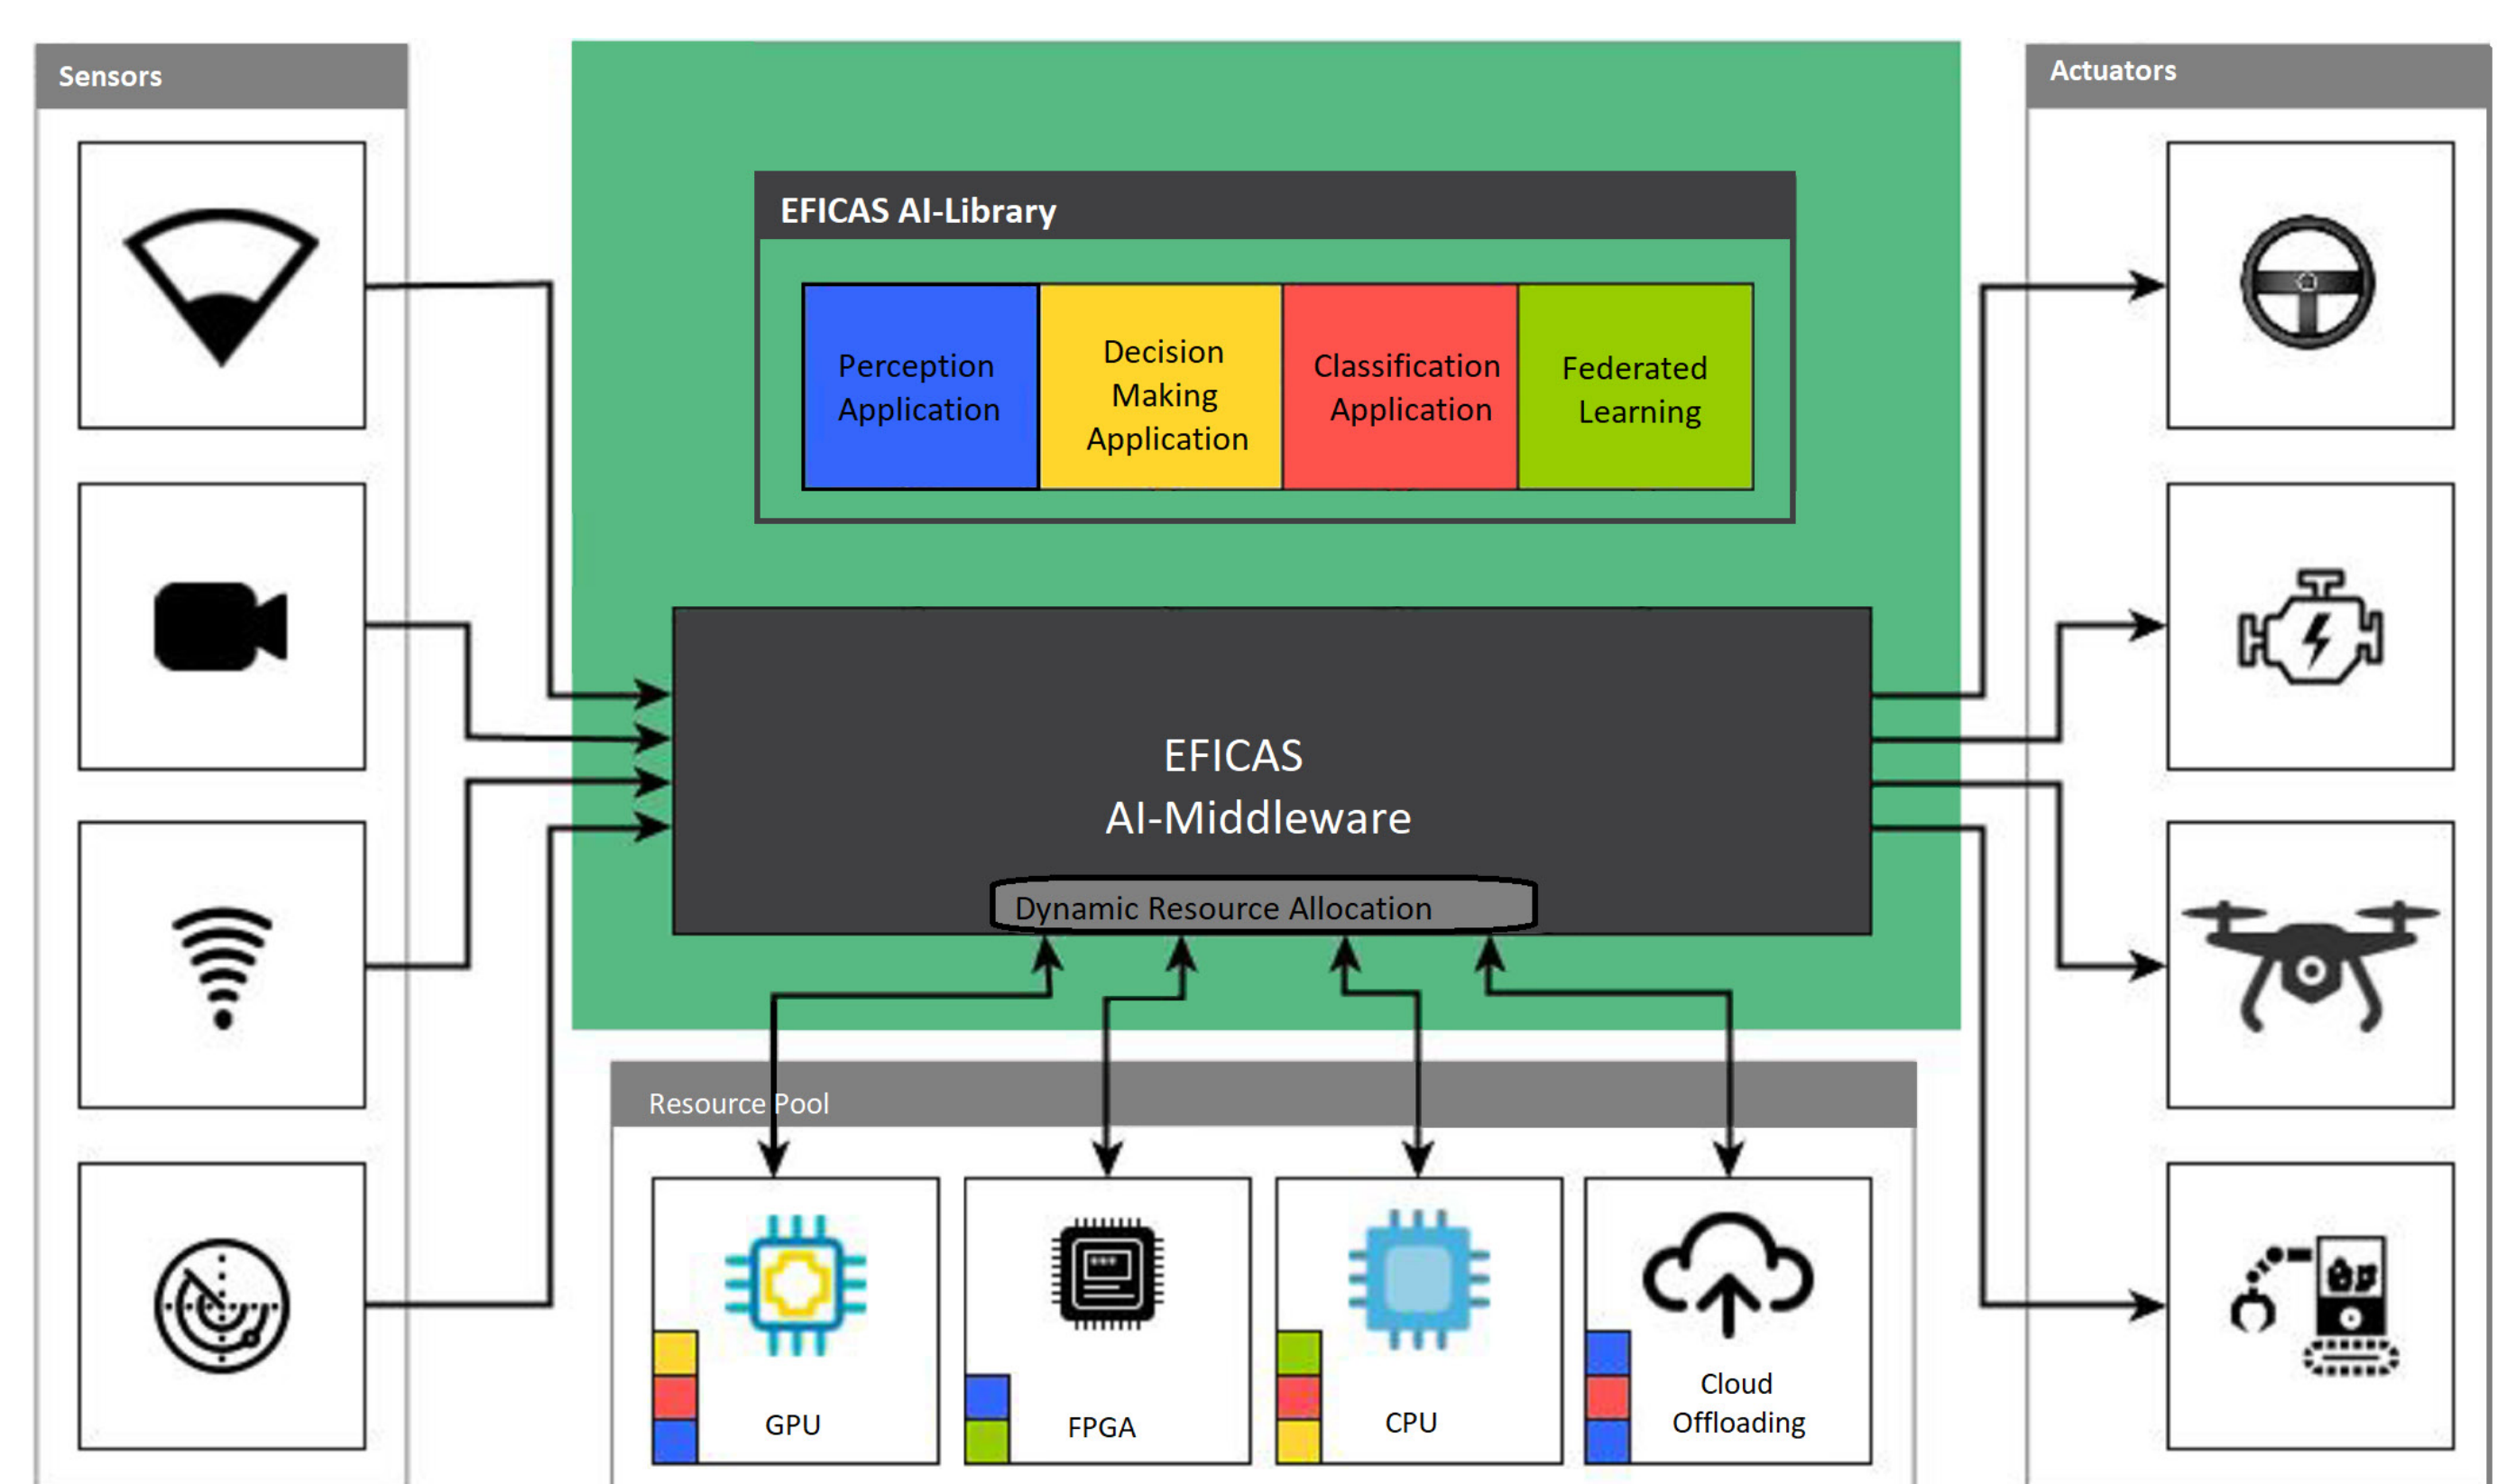

eficas.eu

EFICAS Use cases

- > Autonomous Agricultural Vehicle
- > Autonomous Mobile Robot
- > Industrial Automation
