

## DAIsy – Developing AI ecosystems improving diagnosis and care of mental diseases

ITEA 4 – 21016

**Work package 7 (WP7)**

**Dissemination & Exploitation**

# **Deliverable 7.5. Public Dissemination Content (36M)**

Document type	: Deliverable
Document version	: No. 2
Document Preparation Date	: March 2026
Classification	: Public
Due Date	: March 2026

**HISTORY**

<b>Document version #</b>	<b>Date</b>	<b>Remarks</b>
1	Sept. 2024	Initial version
2	March 2026	Final version

**Table of Contents**

1 Public Dissemination ..... 4  
2 Publications ..... 4  
3 Conferences ..... 4  
4 Public Website..... 4

## **1 Public Dissemination**

This task focuses on the public dissemination of scientific- and technological results through national and international publishing channels and the DAISY website.

The latest findings, results and demo's will be published through the website, during the project and after the project end. The website will be live after the project end to assist in future exploitation.

During the project we will evaluate the effectiveness of the dissemination strategy and improve the strategy accordingly.

The strategy is to publish and spread the information on:

- Achievements
- Exploitable results

Achievements includes publications and posters, attending and organizing conferences, workshops and tradeshows.

Exploitable result includes scientific methods, AI models, open-source solution and new product applications.

## **2 Publications**

Relevant publications will be mentioned on the website, feedback on the publications will be measured and evaluated during the project in order to improve the effectiveness (eg feedback from the market/academia).

Publication strategy:

In order to publish effectively all partners will send their coming publication topic and which publisher they will send out the publication.

Publications by multiple partners will be coordinated to achieve maximum effect. This will be the case of uses cases where more partners are involved. Depending on the case, it can be decided to focus on specific countries or international publishing.

The joint publication plan is to publish important findings during and at the end of the project. Attached there are examples of relevant publications.

## **3 Conferences**

The strategy is to attend relevant national and international conferences in a coordinated way and provide feedback after the conference with an action plan.

Partners will provide every half year their conferences and discuss which partners attend in order to avoid doubles.

Attached there are conferences which are relevant for the upcoming period.

## **4 Public Website**

The project website is <https://daisy-project.org/>

The website will be useful to the healthcare community with focus on the latest innovations on diagnosis accuracy and treatment selection in Major Depressive Disorder (MDD) and Eating Disorder (ED).

The website contains the introduction to the project, use cases, consortium information, blog posts, news and articles of our latest developments.

The publication strategy is to publish latest news, developments and findings on the website. Attached screenshots of the website.

In DAIsy Project, 73 achievements were reached;

- 8 Academic exams generated by the project
- 9 Collaboration
- 11 Conference
- 2 Hiring for project
- 3 Internal
- 6 New product
- 3 New service
- 2 New system
- 1 Open source software
- 1 Press release
- 20 Publication
- 1 Standard extension
- 1 To end-users
- 1 University – Industry – Knowledge transfer for project
- 4 Workshop
