# REMO

Remote patient-targeted health monitoring to reduce clinical workload

## Deliverable 5.1

### Public website and social media channels for the project

Project Coordinator	Luís Conceição		
Start date Project	January 1 <sup>st</sup> 2025	Duration	36 months
Version	1.0		
Status	Final		
Date of issue	12/05/2026		
Dissemination level	Consortium Confidential		

## Authors' data

Author	Partner
Final editor's address	Luís Conceição ISEP – Instituto Superior de Engenharia do Porto Rua Dr. António Bernardino de Almeida, 431 4249-015 Porto, Portugal

# 1. Introduction

The REMO project dissemination activities are designed to address the growing need for effective communication in the rapidly expanding field of remote healthcare solutions. As digital health technologies and telehealth systems continue to evolve, ensuring that relevant stakeholders are well-informed, engaged, and prepared to adopt such innovations becomes increasingly important. By promoting awareness, usability, and evidence-based value of the REMO solution, dissemination efforts contribute to bridging the gap between technological development and real-world application. This is particularly critical in a landscape where numerous remote healthcare systems are being developed, but their successful implementation depends on user acceptance, professional integration, and informed decision-making.

## 1.1. Purpose of the document

---

The main purpose of this REMO deliverable is to present the public website and social media channels established for the project. These channels constitute the initial online presence of REMO and provide a basis for communicating the project's objectives, activities, progress and results to external audiences.

## 1.2. Related documents

---

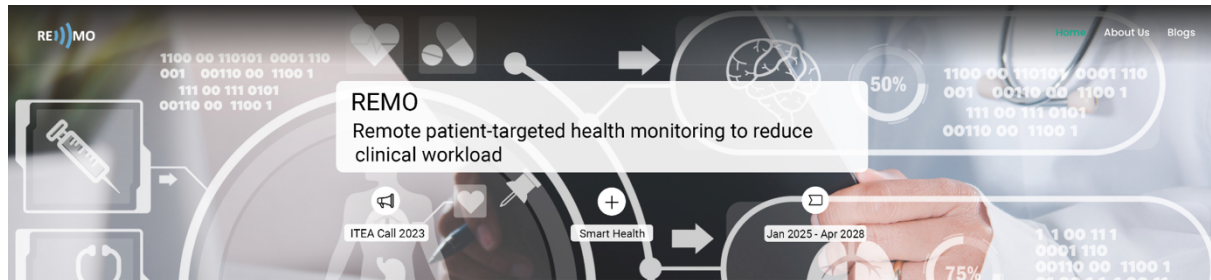

(E.g. other deliverables) – none

## 2. Website

### 2.1. Accessible on

The REMO project website can be accessed on: <https://remo-project.eu/>

#### Project description

Shortages in healthcare workers and changing demographics ask the use of home-based care, which improves monitoring, patient compliance, reduces costs, and frees up healthcare facilities for critical needs. The REMO project will innovate continuous and unobtrusive monitoring in professional healthcare and provide support to clinicians, patients in their treatment and optimal recovery at home by providing the right information at the right time for the right person. REMO will address three healthcare market segments: the Healthcare market in general, the Remote patient monitoring market and the Healthcare AI market.

#### Posts

October 1–3, 2025

#### EPIA 2025 Artificial Intelligence conference

The conference on Artificial Intelligence brought together project partners from Lithuania and Portugal, along with researchers and industry experts, to exchange knowledge and present their latest work. The sessions highlighted the complexity of integrating AI into clinical practice, with discussions ranging from data quality and interoperability to the role of real-time analytics in clinical decision-making. [...]

## 3. Social Media

### 3.1. LinkedIn

<https://www.linkedin.com/company/project-remo>

The screenshot shows the LinkedIn profile page for 'Project Remo'. At the top, there is a navigation bar with icons for 'Início', 'Minha rede' (18), 'Vagas', 'Mensagens' (14), and 'Notific'. Below this is a search bar with the text 'Pesquisar'. The profile header features the 'REMO' logo, the name 'Project Remo', and the description 'Tecnologia, Informação e Internet · 2 seguidores · 11-50 funcionários'. There are two buttons: '+ Seguir' and 'Envie mensagem'. Below the header is a menu with 'Início', 'Sobre', 'Publicações', 'Vagas', and 'Pessoas'. The main content area is titled 'Visão geral' and contains a paragraph of text: 'Healthcare systems worldwide are facing increasing pressure due to demographic ageing, shortages of healthcare professionals, rising costs, and the growing prevalence of chronic and long-term health conditions. These challenges are particularly relevant in areas requiring continuous follow-up, ... ver mais'. Below this is a button 'Exibir todos os detalhes →'. The bottom section is titled 'Publicações da página' and shows a post from 14 hours ago with the text 'Project description · 8 páginas' and 'Project description:'.
