# The DICOMA Web

This public website has been created to facilitate the dissemination of the actions to be undertaken on the project, and to become the means of communication for the various members of DICOMA.

The access URL is as follows: <http://dicoma.eu/>

## Main Page

It provides the description of the project and the main goals to accomplish. It also details the awarding of the ITEA2 label and the various authorities that fund the project in every country involved.

**DiCoMa - Disaster Control Management**

In recent years, the world has seen some dramatic disasters, both natural and manmade. Some spectacular examples include the Indian Ocean Tsunami in 2004, Hurricane Katrina in the same year, the terrorist attacks in Madrid (2004), London (2005), and Mumbai (2007), most recently, the earthquakes in Haiti and Chile (2010).

Disasters such as these are far beyond the ability of a single agency (even one funded by a large, wealthy government) to deal with, and require cooperation between multiple agencies, frequently from multiple countries. Moreover, decision makers dealing with such disasters are frequently swamped with massive amounts of often-conflicting information, on which decisions need to be made in real-time. Adding this to the need to take into account, social, political and economic factors, it is no wonder that many incorrect decisions are made, worsening an already difficult situation. On the other hand effective training of such situations, especially in a multinational setting, requires an enormous effort and thus cannot be used very often.

The goal of the DiCoMa project is to ensure effective management of large disasters and complex emergencies by providing a set of tools that aim to improve the effectiveness of decision makers in dealing with disasters by better training and in situ support in the field. This toolset will include:

- ▶ **Data Abstraction tools** – A Comprehensive set of tools designed to process and combine information from a large variety of public and private sources, allowing the creation of a unified data set, which can be easily explored and understood by decision makers.
- ▶ **Simulation and Modelling Tools** – DiCoMa proposes to create a suite of simulation tools that model both human behaviour and natural phenomena (i.e. fires, earthquakes, weather patterns...). The models will be based upon extensive theoretical work and field experience.
- ▶ **Decision Support and Training tools** – DiCoMa intends to create applications to be used by decision makers during both real and simulated disasters, that presents information to the decision maker in a manner that is easily and quickly understood, proposes alternative actions, indicating the implication of each alternative. Using simulation modeling, and disseminates decisions to all personnel, equipment, and agencies involved in the disaster response process.

In order to achieve these objectives, the DiCoMa consortium intends to follow three main principles:

1. **People** – The DiCoMa consortium believes that effective disaster management requires taking into account people, and the way they react to emergencies. This results in an intense usage of User Centered Design, involving many application partners (as potential users), as well as studying behavior patterns in emergencies and taking these patterns into account, in the design and implementation of DiCoMa.
2. **Interoperability** – DiCoMa intends to focus on the ability of agencies to cooperate, sharing information and resources, regardless of internal procedures and regardless of language. Furthermore DiCoMa will aim at defining a standardized Process Framework, which will allow the different parties in a disaster scenario to work collaboratively together, but still comply with their own country specific set of processes, rule and regulation.
3. **Validation** – The DiCoMa consortium intends to prove the feasibility of the developed concepts and prototypes by executing a validation phase, allowing actual users to work with the system, managing simulated multi-national disaster scenarios.

The DiCoMa consortium includes 40 partners from 8 different countries – sharing their expertise and experiences. The Consortium is purposely large: This was done intentionally, as the project is intended as a "Reference Model", incorporating many up-and-coming technologies in the field of crisis management.

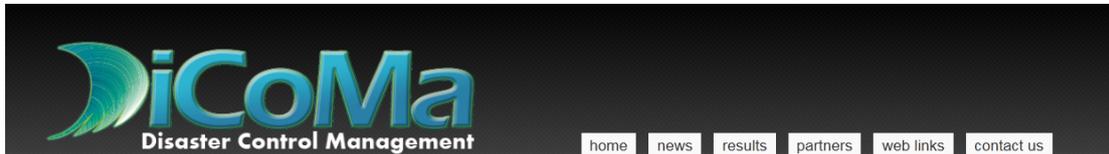

**ITEA2**  
INFORMATION TECHNOLOGY FOR EUROPEAN ADVANCEMENT  
ITEA2-Labeled project

**The Dicoma project has partners from 8 countries:**  
Spain, Belgium, Finland, France, Germany, Greece, Israel and Turkey.

#### Kick - Off Meeting

Written by Indra Software Labs  
Thursday, 22 December 2011 12:31

On September 12th -13th of 2011 the Kick-off meeting of the DICOMA project took place.

The main points that were reviewed during the meeting were the final structure of the DICOMA partners, the DICOMA general overview, the status of milestones and deliverables, and the project management structure, among others.

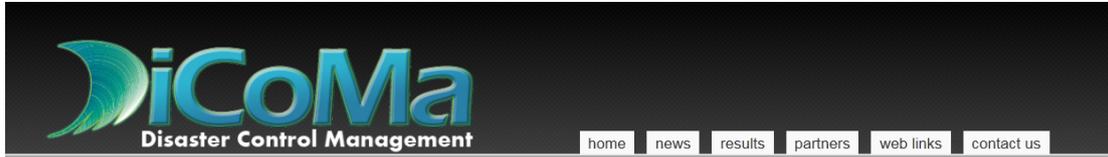

One of the points discussed at the meeting was the number of members who went forward with the project. Also spoke about the restructuring of the DICOMA project.

Other topics that were treated in the DICOMA kick-off were the project scope and objectives, the business value, the introduced challenges, the project structure and work packages, as well as the tasks and WP leaders.

Last Updated on Thursday, 22 December 2011 12:32

## Results Section

In this section we will present the summaries of the project deliverables and yearly activity. If applicable, you can also upload information about the various internal documents generated in each year period.

## Web Links Section

As a repository of interesting links, this section allows you to collect addresses to web sites of interest, like corporate webs, public entities, links to related projects, pages with information associated to the project, etc.

This section can be edited by all the participants of the project from the private area.

Different categories are provided from the web management to facilitate the clustering of the pages.

### Contacts

Contact Details for this Web site

- [Administrator](#)

## Private Area

A specific area has been created for the DICOMA members to ensure the confidentiality of certain information that we can upload to the project page. Each of them has a username and password that gives access to restricted areas of the web.

Using the form included, the user is validated on the page and accesses the private menu options. Once the user has been validated, the **Private Area** and **User Menu** menu will appear.

The screenshot displays the DiCoMa website interface. On the left, there is a 'Main Menu' with links to Home, News, Results, Web Links, Partners, Private Area, Why DiCoMa?, and Contact us. Below the menu is a search bar and a login form with fields for Username and Password, a 'Remember Me' checkbox, and a 'Login' button. Links for 'Forgot your Password?', 'Forgot your Username?', and 'Register' are also present.

The central navigation bar contains a 'User Menu' (highlighted with a red circle) and a 'Private Area' (also highlighted with a red circle). The 'User Menu' includes links for Article Submission, Web Link Submission, User Form, and Logout. The 'Private Area' includes links for Archive, Work Package News, Concepts, Deliverables, Task Table, and Forum.

On the right, there is a 'Dicoma Project' section with a date 'Monday, 07 November 2011 13:10' and the title 'DiCoMa - Disaster Control Management'. The text discusses the world's dramatic disasters and the project's goal to improve decision-making effectiveness. It lists three key objectives: 1. People, 2. Interoperability, and 3. Validation. At the bottom, there is a logo for ITEA 2 (Information Technology for European Advancement) and text indicating it is an ITEA2-Labeled project, with 'The Dicoma p Spain, Belgium' and 'Funding Auth' partially visible.

## Project Archive Section

This section has been created as a document repository. It is organized in different folders, which collect important project information accessible only to DICOMA members.

The screenshot displays the "Archive" section of the web application. On the left side, there is a vertical sidebar menu with three main sections: "Main Menu" (containing links for Home, News, Results, Web Links, Partners, Private Area, Why DICoMa?, and Contact us), "User Menu" (containing Article Submission, Web Link Submission, User Form, and Logout), and "Private Area" (containing Archive, Work Package News, Concepts, Deliverables, Task Table, and Forum). Below the menu is a search bar with the text "search...". The main content area is titled "Archive" and shows the "Current folder: archive". Below this, there is a "Filter file list:" input field. The main part of the page is a list of folders, each with a folder icon, a name, and a set of three small icons (a green up arrow, a green down arrow, and a red X) on the right. The folders listed are: Change Requests, Deliverables, Glossary, Meeting Minutes, Meetings, Project Documentation, Reviews, Templates, Web, WP1, WP2, WP3, WP4, WP5, WP6, WP7, and WP8. At the bottom of the page, there are small navigation icons for back, forward, and search.

## Work Package News Section

This section will show the news that DICOMA registered users publish as a Blog on each work package. To publish the news in this blog, the users shall select the *Work Package News* section when publishing their articles, and one of the 8 categories (one by each work package) belonging to the work package related to their news.

Work Package News

## Concepts Section

In this section, the users can add concepts as a dictionary of commonly used terms in the project, which require a small explanation for the other users. When publishing their concepts in this section, the users shall select in the form the *Concepts* section, and the *Concepts* category for their description to be published by the page administrator when validated.

The screenshot shows the "Concepts" section of the website. On the left side, there is a vertical navigation menu with three main sections: "Main Menu" (containing Home, News, Results, Web Links, Partners, Private Area, Why DiCoMa?, Contact us), "User Menu" (containing Article Submission, Web Link Submission, User Form, Logout), and "Private Area" (containing Archive, Work Package News, Concepts, Deliverables, Task Table, Forum). Below the menu is a search box labeled "search...". The main content area is titled "Concepts" and includes a "Title Filter" input field and a "Display # All" dropdown menu. Below these is a table with the following structure:

#	Article Title	Author	Hits

## Deliverables Section

It shows the project deliverables, along with the work package to which it belongs, deliverable state, etc. This information is static, it can only be accessed by the page administrator, and it aims at providing an overview of the deliverables and their state. In the TASK TABLE section that will be explained below, the users will be able to modify this information.

### Deliverables

Written by Administrator

Monday, 07 November 2011 17:13

ID	Deliverable name	WP	Type	Date	Status
D1.1	Specification of the UCD-Process (Methodology, initial Version of process model)	1	Document	TD+3	-
D1.2	Specification of the UCD-Process (Definition of methods, artefacts)	1	Document	TD+6	-
D1.3	Specification of the UCD-Process (Updated version depending on organizational requirements)	1	Document	TD+12	-
D1.4	Specification of the UCD-Process (Updated version including lessons learned)	1	Document	TD+24	-
D1.5	Specification of the UCD-Process (Final report on UCD process methodology including lessons learned)	1	Document	TD+36	-
D1.6	Description of the analysis and results (Results from 1 <sup>st</sup> interviews and workshops)	1	Analysis-Report	TD+4	-
D1.7	Scenario Description (1 <sup>st</sup> version: high level identification of relevant scenarios and context of use)	1	Document	TD+6	-
D1.8	Requirements Definition (1 <sup>st</sup> version: high-level requirements)	1	Specification	TD+6	-
D1.9	Description of the analysis and results (Results from 2 <sup>nd</sup> interviews and workshops)	1	Analysis-Report	TD+8	-
D1.10	Scenario Description (2 <sup>nd</sup> version: definition of relevant scenarios and organizational constraints)	1	Document	TD+9	-

## Task Table Section

This table shows the real time state of each of the tasks and milestones of the project. The registered users may update the state of their tasks and milestones. Only the administrator of the web pages will be able to add or delete tasks and deliverables, and to edit certain fields in the table, as Members, delivery dates, etc. Users may only edit the fields: In progress, Completed and State. This information will be entered by the users via a form. This form also contains restrictions that will show an error message on the screen if there is some inconsistency when filling in the form. Once the form has been correctly filled in, a message will appear informing the user that the update was successful.

## Forum Section

Forum with multiple options in which the registered users can share information about each work package, ask questions, doubts, answer the other users, upload or lend some file, post some tutorial, if necessary, etc. The forum has a category for each work package, so that users can access the different categories according to the work package related to their doubt or information to share. Apart from publishing posts in the forum, the users may also subscribe to a category, so that the users subscribed to that category will automatically receive in their e-mail addresses mails with the content of the posts published by the users. In this way, the users will be up to date with the latest news of the category in which they are subscribed, without having to enter in the forum all the time.

The screenshot displays the forum's main page. On the left is a sidebar menu with sections for 'Main Menu', 'User Menu', and 'Private Area'. The main content area features a user profile for 'dicoma' and a 'Main Menu' table listing various work packages (WP1-WP8) with their respective topic and reply counts. Below the table are sections for 'Who is online' and 'Dicoma Forum Statistics'.

## Article Submission Section

As before mentioned, the different project members can post articles on the page. In the next form you can see all the necessary editing capabilities and options that allow great flexibility when writing the articles. To publish news you must select the *News Section* and select one of the categories belonging to this section (*General News, Provider News, ITEA2*).

The screenshot displays the 'Submit an Article' form. On the left is a sidebar menu with three sections: 'Main Menu' (Home, News, Results, Web Links, Partners, Private Area, Why iCoMa?, Contact us), 'User Menu' (Article Submission, Web Link Submission, User Form, Logout), and 'Private Area' (Archive, Work Package News, Concepts, Deliverables, Task Table, Forum). A search box is located at the bottom of the sidebar. The main content area is titled 'Submit an Article' and contains an editor with a toolbar and a large text area. Below the editor are several form fields: 'Title' (text input), 'Path' (text input), 'Image' (checkbox), 'Caption' (text input), 'Publishing' (checkbox), 'Section' (dropdown menu set to 'Uncategorised'), 'Category' (dropdown menu set to 'Uncategorised'), 'Published' (checkboxes for 'No' and 'Yes'), 'Show on Front Page' (checkboxes for 'No' and 'Yes'), 'Author Alias' (text input), 'Start Publishing' (calendar icon), 'Finish Publishing' (calendar icon), 'Access Level' (dropdown menu with options 'Public', 'Registered', 'Special'), 'Ordering' (checkbox), 'MetaData' (checkbox), and 'Description' (text area). A 'Keywords' field is located at the bottom of the form.

## Web Link Submission Section

In the same way that it is possible to upload articles, the web is prepared to collect links of interest, allowing you to set a category for each of them. These will appear in the “Web Link” section.

# Using the Web

## How to submit an article

To send an article to the page and therefore to publish it in the relevant news section, you must access the private area and validate yourself as an DICOMA member.

Once you have accessed the private area, click the “Article Submission” section in the “User Menu” menu. Thus, you will access the article registration form mentioned in the previous “Article Submission Section”.

Home > Article Submission > New

Metadata

Description:

Keywords:

Article title. Header text of the news.

Space for writing the article. It will be published in the same format as it is here.

The  icon allows you to preview the article to publish.

It determines where the article will appear on the web. The sections correspond with the web menu.

Information about the publication date.

It determines who can see the article.

- Public > everyone accessing the web.
- Registered > Project members only.
- Special > Not used.

The text editor below includes all the features and utilities required to create an article with images, tables, tabs, etc. Some of the most significant utilities that may need a short explanation are the following:

[Image](#)  
[Pagebreak](#)  
[Read more](#)

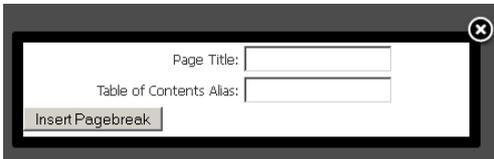

Simple window to add and upload images.

For advanced functions, use the Image icon on the toolbar

[Image](#)  
[Pagebreak](#)  
[Read more](#)

It allows us to add reading pages and a table of contents to the article.

[Image](#)  
[Pagebreak](#)  
[Read more](#)

It adds the “**Read more**” link to the news. In this way, when displaying the articles, it will be possible to read the text only up to this mark. Click the link to access the rest of the article.

## ***How to publish Work Package News (Work Package News)***

The first thing to be done by users who wish to publish an article in this section is to access the private area with their username and password.

Once you have accessed the private area, click on the “Article Submission” section in “User Menu”. In this way you access the article registration form mentioned in the previous section: “Article Submission Section”. To publish work package news in the *Work Package News* section, users shall select the **Work Package News** section when selecting in the form the section and category to which their article belongs, and one of the 8 categories belonging to this section that correspond to each of work packages that make up the DICOMA project (WP1, WP2, WP3, WP4, WP5, WP6, WP7, WP8).

Publishing

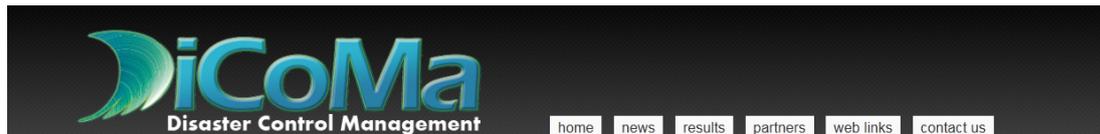

Section:

Category:

Remember that the articles submitted for publication, will NOT be published in this section until the webmaster validates the article.

## How to edit the Task Table (Task Table)

The first thing users must do is to access the private area with their username and password and then enter the *Task Table*. Once in this section, the users who need to edit the status of some task or milestone, will click on the *Edit* link corresponding to the task or milestone they want to edit. By clicking on this link, a form will appear with the table fields that the users can edit. It is important to note that the information contained in the fields that show the task or milestone name, the *Members* field and the *Date End* field cannot be edited by the users, since this information will be only editable by the webmaster/s.

**Task Table**

Completed

Work Package

Type

When filling in the form, the users must specify the state of the deliverable: “*State*” selecting one of the two states of the task or milestone. If the task or milestone is completed, select the “*End*” option. If not, select the “*In progress*” option. In the “% *In progress*” section, the users will enter the completion percentage of the task or milestone. In the “*Completed*” field, the users will tick the “*OK*” box if the task or milestone is completed. If not, they will tick the box “*X*”.

This form also contains restrictions that will display an error message on the screen if there is some inconsistency when completing the form. Once completed successfully, a message will appear informing the user that the update was successful.

## How to publish a new post in the Forum and how to subscribe to a category (Forum)

To access the “Forum” section, the users will have to enter the private area with their username and password. Once in this section, three blocks will appear: The “Main menu” block contains the Forum with 8 categories, one by each project work package. To publish in a category, the users will first have to access it clicking on the selected category. Once in the category, you can read the related posts published, publish new topics and/or subscribe to a category using the **+ NEW TOPIC** **SUBSCRIBE** buttons. The “Who is online” block displays the users that are currently online in the forum. The “DICOMA forum Forum Statistics” block shows a series of statistics of the DICOMA forum such as the number of messages posted, the number of existing categories, the number of answers, etc.

The screenshot displays the DICOMA forum interface. At the top, a user profile for 'isl' is shown with a 'Logout' button. Below this is a search bar and a 'Board Categories' dropdown. The main content area is titled 'Main Menu' and contains a table of 8 categories:

Category	Topics	Replies	Last Post
WP1: User Centred Design	1	0	Welcome to Kunena! by admin 4 months, 2 weeks ago
WP2: User Interface Techniques	0	0	No Posts
WP3: Disaster Support Management and Trainig	0	0	No Posts
WP4: Data and Services Integration Platform	0	0	No Posts
WP5: Architecture Communications and Validation	0	0	No Posts
WP6; Process Inter-Operability & Standardization	0	0	No Posts
WP7: Management	0	0	No Posts
WP8: Dissemination & Exploitation	0	0	No Posts

Below the categories is the 'Who is online' section, showing 2 users online (1 Member and 1 Guest). The 'Dicoma Forum Statistics' section provides the following data:

- Total Messages: 1 | Total Subjects: 1
- Total Sections: 1 | Total Categories: 8
- Today Open: 0 | Yesterday Open: 0
- Today Total Answer: 0 | Yesterday Total Answer: 0
- Total Users: 18 | Latest Member: cilujan

The page is powered by Kunena and took 0.33 seconds to create.

## Web Management

For the publication of the page on the Internet, a domain and a hosting in the CDMON server ([www.cdmon.com](http://www.cdmon.com)) have been acquired.

Among the services provided by the hosting, we can make use of the publication of pages through a content manager (Drupal or Joomla). We have used Joomla.

To know the features of the content manager and the way to perform the maintenance and management, you can visit <http://www.joomlaspanish.org/>
