

# ITEA Award of Excellence for International Research Project EMPHYSIS

September 16, 2021

## PikeTec member of award-winning research project

PikeTec has contributed to the ITEA collaborative research project EMPHYSIS aimed at establishing the new "eFMI standard". Today, we can humbly announce that project EMPHYSIS received the ITEA Award of Excellence for this achievement.

## Accelerating model-based development of embedded software

Together with partners from the industry and academia from Belgium, Canada, France, Germany and Sweden the group, led by BOSCH, set out the foundation to develop a workflow and tools in a way that eases the use of physic-based models/functions in embedded software with "better code and less effort".
