ITEA Success story: Indra - Intelligence at the edge of the network, a vision ahead of its time

Post date: 27-October-2015

Two important topics for Indra in the last years were tackled during the ITEA projects Nemo&Coded, Imponet and DiCoMa: Big Data technologies and real-time data integration platforms. With respect to Big Data technologies, they were investigated and used, especially in the Imponet project, applying them to the energy domain at a time when few people or organisations were considering it. The results were extremely encouraging and it gave Indra a head start on the competition.
