Focus: design and development of heterogeneous systems.

For PANORAMA’s consortium of tool vendors, library providers, consulting, training and engineering companies, automotive software developers and systems developers, these innovations enable the faster and more cost-effective development of higher-quality systems.

Business opportunities also arise through the modelling environment’s collaboration possibilities and the rapid growth of the early analysis market. Companies thereby contribute to the development of smart mobility, an important step towards societal goals regarding better quality of life, social inclusion, road safety and climate protection.
ITEA is a transnational and industry-driven R&D&I programme in the domain of software innovation. ITEA is a EUREKA Cluster programme, enabling a global and knowledgeable community of large industry, SMEs, start-ups, academia and customer organisations, to collaborate in funded projects that turn innovative ideas into new businesses, jobs, economic growth and benefits for society.
