

An ITEA Smart Engineering project

GENIUS

Generative AI across software development phases

Project summary

To increase quality and efficiency in software development, the ITEA project GENIUS will integrate generative artificial intelligence (GenAI) into existing ecosystems while providing guidelines and best practices to ensure data security, privacy and reliability.

Consortium

Website

<https://genius-itea.github.io/>

Project duration

November 2024 - May 2028

Expected key results / USPs

- > **Integrated Tools:** GenAI solutions across development phases
- > **Company-Specific Solutions:** Adapted to existing data, tools and workflows
- > **Practical Evaluation:** Validation in diverse industrial use cases
- > **Guidelines & Best Practices:** Recommendations for effective and reliable GenAI use

GENIUS solutions integrating GenAI
