

25 years of ITEA webinar - Belgium Barco n.v. pitch

2 June 2023 | Online
Andy De Mets

Barco n.v.

- Barco is a global company with headquarters in Kortrijk (Belgium). Our **visualization and collaboration** technology helps professionals accelerate innovation in the healthcare, enterprise and entertainment markets. We master the **entire visual chain**, from acquisition through to the display of images, adding all the capabilities that help bring the image to the screen. **4 building blocks** form the foundation for Barco's innovation for impact in the future: Image Processing; Advanced display and projection; Computational optics and Connectivity & data analytics

Possible collaboration

Our dream

New Product Design Process for Product Supply Chain Resilience and Prediction

- *Numbers and types of threats that can undermine a supply chain are now greater than ever. Should be considered at every step of the design and product-cycle*
- *Mitigate most supply chain disruptions, limit the impact of those that occur, be predictable to respond quickly to operational disruptions and have a flexible contingency plan in place.*
- *Be able to forecast and anticipate disruptions, and, in many cases, avoid them altogether.*
- *Not only for (individual) hardware components, but also towards functional building blocks that are created by means of integrated and logic components, including multi-processor systems.*

Looking for

Companies with similar issues, tooling companies, component-providers, ...
