

ITEA Call 2026

Information and Pitch session

Dong-I.T. B.V. pitch

23 June 2026 | Amsterdam, the Netherlands
Berta Ros Pla

ITEA 4

ITEA is the Eureka Cluster on software innovation

DongIT: founder of Security Reporter

DongIT

Company data

- Founded: 2012
- Employees: 23
- Country: Netherlands

Looking for

Consortium partners to build **SERT (Sovereign European Reporting Tool)** our ITEA Call 2026 project.

Specifically: an **AI/ML research partner**; **regulated end-users to pilot it** (finance, healthcare, government); **security or pentest providers in two or more other countries** (optional); and **standards & compliance expertise** (CRA, NIS2, CSAF/SBOM).

Also open to joining adjacent project ideas on sovereign AI for cybersecurity.

Expertise / main products

- **15+ years of hands-on penetration testing & security assessments:** ISO 27001 and CCV Pentest certified (the Dutch quality standard for pen testing).
- **We turned that practice into a product: Security Reporter.** SR is a self-hosted assessment & reporting workspace, already used across Europe by essential public bodies and cybersecurity players such as the European Central Bank, Telenor, Orange Cyberdefense, ABN AMRO, ASML, Capgemini and EY.
- **We want to bring testers + a live, European, self-hosted platform to the next level:** is exactly what a hybrid human + AI assessment engine needs, and what no competitor combines.
