ITEA is the Eureka Cluster on software innovation

Republic of Korea

KIAT –
Korea Institute for Advancement of Technology

Being one of the world's leading spenders on R&D as a percentage of GDP, Korea is a global innovation frontier excelling in key technologies including digital technologies and software innovation.

As a full member of the EUREKA network, Korea actively engages in international R&D projects and supports them through KIAT, its national funding body.

Korea values highly innovative projects with strong commercial potential, and invites Korean R&D players to collaborate with international partners to address global challenges and create effective, sustainable solutions.

Eligibility criteria

> Project has received a label from ITEA

> Korean consortium must include at least 1 Korean company

> No single organisation or country can be responsible for more than 70% of the project budget

Funding outlook

> Open to all organisations, from companies with registered R&D laboratories, research institutes and universities

> Funding amount is up to KRW 500,000,000 (approx. 350,000 EUR) per project, per year (up to 3 years)

> The amount of government grants varies depending on the type of executing organisations and project

National Priorities

We are looking for:

> Highly innovative international collaborative projects with strong commercial potential
