ITEA PO Days 2025

How to shape your PO

16 September, Estoril

Bilge Özdemir – ITEA Project Coordinator

ITEA is an industry-driven, bottom-up programme, close-to-market, financed through national and private funding

- How to maximise your chance of success
 - What are the goals of ITEA
 - Expectations from an ITEA project

Introduction of the Project Outline template

What is an ITEA Project?

RD&I projects in software innovation

International & collaborative (≥ 2 countries), mix of SMEs, industry, research, end users.

Goals:

- Deliver innovations beyond the state-of-the-art
- Create market and societal impact (jobs, new products, standards)
- Strengthen international collaboration & value chains
- Close-to-market results expected within 2–3 years after project

Eligibility Criteria of ITEA

- At least two organisations not belonging to the same parent organisation
- At least two countries:
 - one Eureka Member Country
 - one Eureka Member or Associated Country
- Project lead from a EurekaMember or Associated Country

For more information on Eureka & Eligibility:

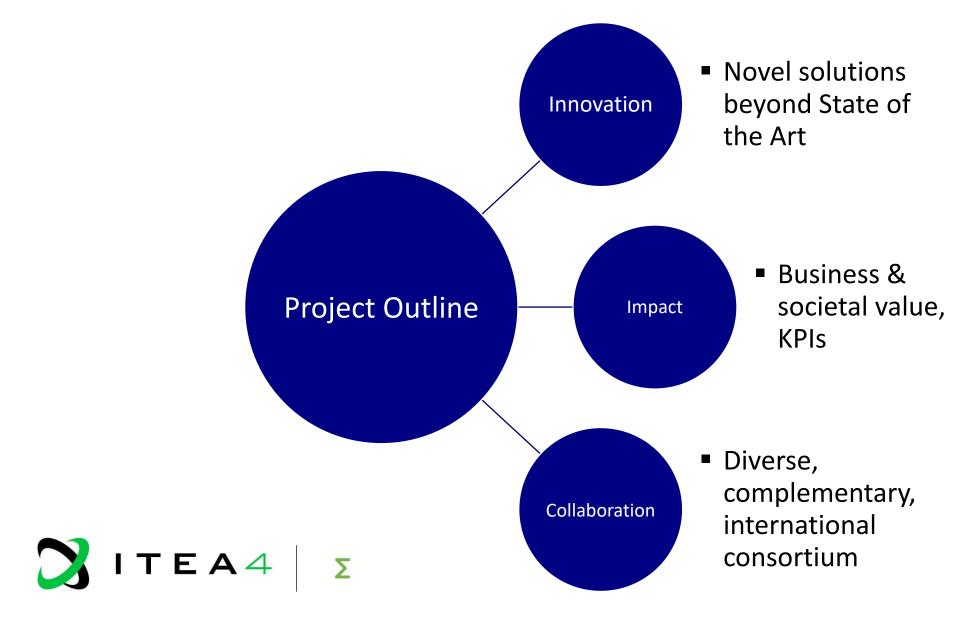

Eligibility Criteria of countries – some examples

Country	Key Criteria
Netherlands	Budget limit per call €10M (max €4M per consortium) Balanced distribution of project costs (<70% in one country) At least one Dutch company must act as national coordinator
Portugal	SMEs or Small-Mid Cap are eligible (large companies are not) National budget ~€13.3M
Korea	Public funding ratios: 33% large, 50% medium, 67% small enterprises
Belgium	Open budget, projects evaluated case by case Universities & research centres eligible; financial viability of companies checked

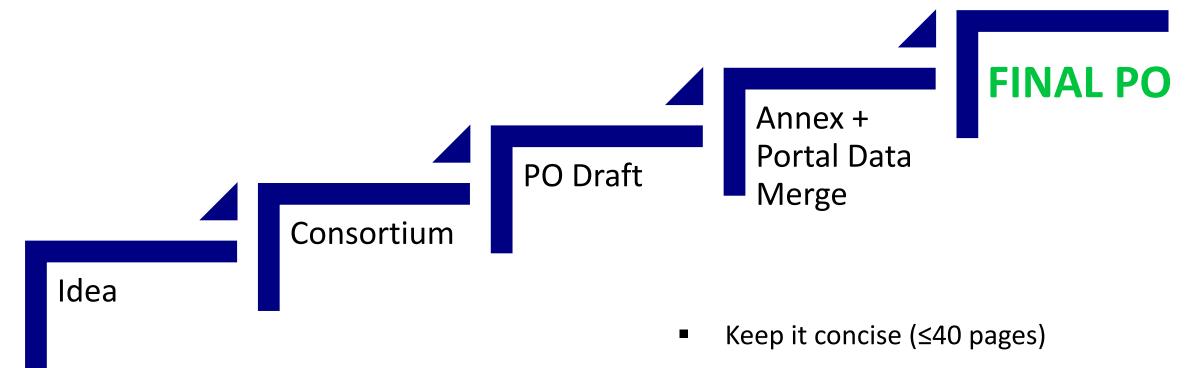

Note: The final document is created by **merging** the corresponding **annex** and the **online** content.

Always check the merged file!

- Strong story matters more than volume
- FPP = PO + Work Plan (work packages, tasks and deliverables)

4.3.	Collaboration in technology level	
4.4.	Collaboration with other projects	

- Define the problem, solution, challenges, use cases, and expected results.
- Ensure that problems are realistic and solutions are innovative and feasible.
- Maintain clear integrity: problem, solution, and innovation must be tied together.
- Expected Results: tangible, credible outcomes

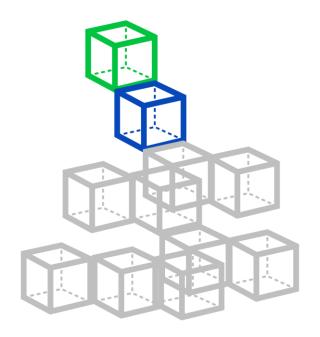

Market & Societal Impact

Unique Selling Proposition:

Clearly show what makes your results distinctive.

Business aspect:

- Job creation, access to new markets.
- Identify target market, sub-markets, competitors.
- Present go-to-market strategy and customer reach.
- Synchronise dissemination & innovation to support exploitation.

Industry aspect:

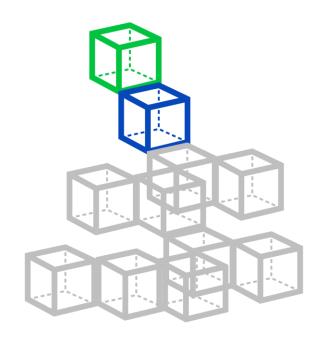

- Highlight links to standards and industrial communities.
- Explain opportunities for standardisation or opensource communities.

Societal aspect:

If relevant, link to clear societal vision (e.g. UN SDGs).

KPIs:

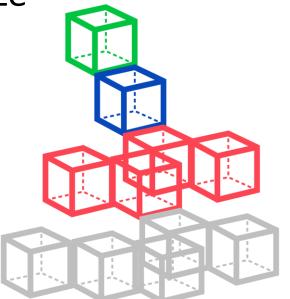

Define measurable business KPIs to convey project results.

Technological Impact

- Innovation: A new approach that advances technology.
- State of the art: Be narrow, focused, and emphasize what current solutions lack and how the project improves them.
- Technological KPIs:
 - Should be measurable with base and target values.
 - Track progress on innovations (not just product/ service counts).
 - Ensure innovations are validated via use cases.
 - Link project deliverables and outcomes directly to innovations.

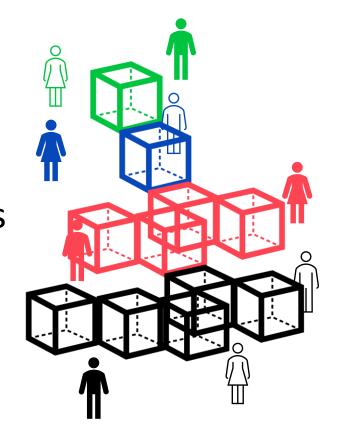

International Collaboration

Build a balanced consortium:

- Good market fit.
- Flexible against funding risks.
- Matches the market value chain.
- Diverse in company types and geographical spread.
- Show mutual support in technology and business areas.
- Highlight complementary expertise, tangible collaborations, and sustainable partnerships.

Part A, C, and Annexes

- Part A Project Key Data
- Part C Partner Descriptions & Market Access

- Annex A: Costs & effort breakdown
- Annex B: Rationale for public funding (country-specific)
- Ensure consistency across Annex + Portal
- Contact national PAs early!

Tips for a winning PO

- Concise, visual, story-driven
- Problem → Innovation → Results →
 Impact
- Diversity & complementarity in consortium
- Avoid generic market reports, vague claims

KPIs must be SMART

- Specific
- Measurable
- Achievable
- Relevant
- Timely

Successful ITEA Projects

SmartDelta

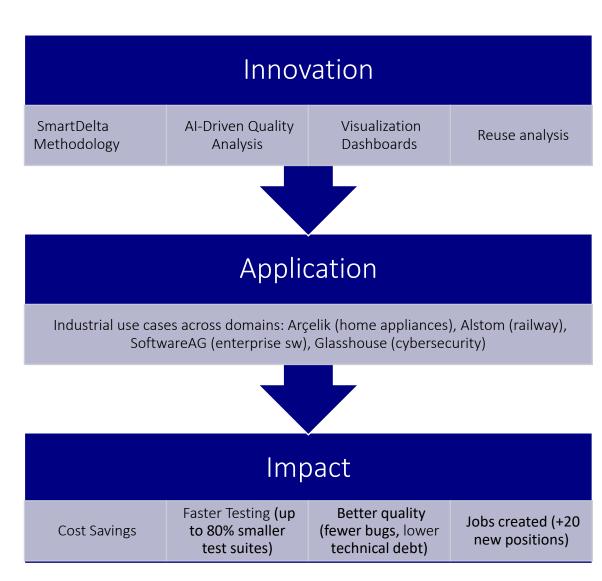

An evolving perspective on software developments

To accurately analyse the quality implications of each change to a software system, SmartDelta developed a methodology and toolset for the automated quality assessment of product deltas in a continuous engineering environment.

ITEA PO Days 2025

Successful ITEA Projects

Through innovations in areas like AI, 3D visualisation and robotic assistance, ASSIST gives control to clinicians and simplifies clinical workflows during imageguided therapy.

ASSIST

Control for clinicians in image-guided therapy

Consortium of 4 countries (NL, BE, SE, TR) co-developing 5 clinical use cases

Federated Learning across NL, SE, TR for brain & liver tumour models

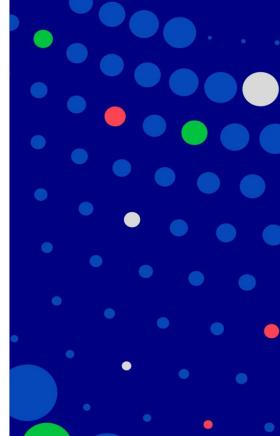

Demonstrators validated with end-users in all 5 use cases

Wrap-up

- PO = foundation of your project
- Shape your story, show your edge
- ITEA Office is here to support you
